

Sustainability Hotel *Hyatt Regency Hua Hin & THE BARAI*

We aim to provide outstanding experiences while advancing sustainability initiatives in all our products and services. This achievement also highlights the collaborative effort between partners to create a valuable and sustainable image of Thai tourism, contributing to Thailand's competitiveness as a Sustainable Destination.

SUSTAINABILITY ACTIVITIES

CARING FOR THE PLANET

Our guestrooms feature motion-detecting sensors and water-saving toilets. Mobile entry reduces the need for plastic key cards. Paper straws are available upon request, and we use large bathroom dispensers to reduce plastic waste. Our food ingredients are locally sourced, and we grow our herbs and garnishes using fertilizers produced by our resort's waste plant. Additionally, for meetings and events, we use natural light in meeting rooms and public spaces.

AWARDS & CERTIFICATE

We achieved the ISO 14001:2015 certification in November 2022 based on our commitment to advancing sustainability actions. The fulfillment of the certification's criteria is in line with Hyatt's sustainability goals.

In 2023, Hyatt Regency Hua Hin & THE BARAI achieved GREEN Health Hotel certification, awarded by the Bureau of Environmental Health, Department of Health.

In 2024, Hyatt Regency Hua Hin & THE BARAI achieved a STAR Rating, awarded by the Tourism Authority of Thailand
